Duration	2 mins 24 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

a. The list is sorted
b. The search continues in the left sublist
c. The search ends successfully ✓
d. The search continues in the right sublist

Question **2**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the left sublist ✓
b. In the entire list
c. In the right sublist
d. At the beginning of the list

Question **3**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. The first element is returned
b. The search is considered unsuccessful ✓
c. The last element is returned
d. An error is raised

Question **4**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Linear

b. Both (1) & (3)

c. Binary ✓

d. Hash

Question **5**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

a. When the list is small and sorted

b. When the list is small and unsorted ✓

c. When the list is large and unsorted

d. When the list is large and sorted

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following is not a limitation of binary search algorithm?

a. Requirement of sorted array is expensive when a lot of insertion and deletions are needed

b. Binary search algorithm is not efficient when the data elements more than 1500 ✓

c. There must be a mechanism to access middle element directly

d. Must use a sorted array

Question **7**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. log n

b. n/2

c. n ✓

d. n-1

Question **8**

Incorrect

Mark 0.00 out of 1.00

Which of the following is a conventional searching technique?

- a. Linear search
- b. Hashing
- c. Dynamic search
- d. Binary search ✗

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

- a. Sorting the list before searching
- b. Skipping every second element
- c. Checking each element sequentially ✓
- d. Dividing the list in half repeatedly

Question **10**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

- a. The search stops immediately ✓
- b. The search backtracks to find duplicate elements
- c. The search continues until the end of the list
- d. The search starts over from the beginning

Question **11**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

- a. Quick search
- b. Merge search
- c. Bubble search
- d. Linear search ✓

Question **12**

Correct

Mark 1.00 out of 1.00

If a list contains 1000 elements, how many comparisons would a binary search typically make in the worst case?

a. 1000
b. 10 ✓
c. 500
d. 100

Question **13**

Correct

Mark 1.00 out of 1.00

Which of the following is a limitation of binary search?

a. It does not work with negative numbers
b. It can only be applied to large lists
c. It is slower than linear search for small lists
d. It requires the list to be sorted ✓

Question **14**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Hashing
b. Linear search ✓
c. Binary search
d. Jump search

Question **15**

Correct

Mark 1.00 out of 1.00

In the context of searching, what is a successful search?

a. When the list is sorted
b. When the list contains duplicate elements
c. When the element is found in the list ✓
d. When the search algorithm finishes
